

AT HOME FAUX SNOW

If you don't have snow outside to play with, here's a quick and simple recipe to make some at home snow to add to your sensory bin.

Materials

- white hair conditioner (refrigerated)
- baking soda
- very cold water

Mix 2 1/2 cups of baking soda with 1/2 cup of cold hair conditioner and 2 tbsp of cold water. The cold conditioner and water just helps the fake snow feel a little more like real snow :)

Mix well and play. You should be able to make little snowmen, form the "snow" into a ball and then break it a part. Add to a sensory bin with other winter related toys, or set out some craft supplies (buttons, pipe cleaners and so on) to help make a snowman.
